

COMPREHENSIVE MEDICAL HISTORY FILE

Last Updated: December 15, 2023

PATIENT DEMOGRAPHICS

Name: Robert Anderson

DOB: 09/23/1979

MRN: 789456123

Primary Care Physician: Dr. Sarah Williams

Allergist/Immunologist: Dr. James Martinez, MD (Board Certified)

Insurance: Blue Cross Blue Shield

Initial Visit Date: 01/10/2023

PRESENTING SYMPTOMS AND HISTORY

Chief Complaints:

- Severe seasonal allergies
- Persistent asthma symptoms
- Chronic rhinitis
- Recurrent conjunctivitis
- History of bee sting reaction

Impact on Quality of Life:

- Missed 12 work days in past year due to allergic symptoms
- Sleep disruption 4-5 nights/week
- Unable to participate in outdoor activities
- Reduced productivity at work
- Social activities significantly limited

DIAGNOSTIC TESTING AND RESULTS

1. Skin Prick Testing (01/15/2023):

Strong Positive Reactions:

- Ragweed: 15mm wheal
- Timothy Grass: 12mm wheal
- Birch Tree: 14mm wheal
- Dust Mites: 13mm wheal
- Honey Bee Venom: 16mm wheal

2. Specific IgE Blood Tests (01/20/2023):

- Ragweed: 45.2 kU/L (Class 5)
- Timothy Grass: 38.7 kU/L (Class 4)
- Birch: 42.1 kU/L (Class 4)
- D. pteronyssinus: 35.6 kU/L (Class 4)
- Honey Bee Venom: 28.9 kU/L (Class 4)

3. Pulmonary Function Tests (01/25/2023):

- FEV1: 65% of predicted
- FEV1/FVC ratio: 0.68
- Significant improvement post-bronchodilator

DIAGNOSIS

Primary Diagnoses:

1. Severe persistent allergic rhinitis (J30.9)
2. Moderate persistent allergic asthma (J45.40)
3. Allergic conjunctivitis (H10.45)
4. Hymenoptera venom allergy (T63.441A)

IMMUNOTHERAPY TREATMENT PLAN

Administering Facility:

Advanced Allergy & Immunology Center

- Certified allergen extraction laboratory
- Full emergency response capabilities
- Dedicated immunotherapy suite
- Standing orders for anaphylaxis management
- Three full-time nurses trained in immunotherapy administration

Treatment Protocol:

1. Build-up Phase:

Week 1-16: Weekly injections

- Starting concentration: 1:100,000 w/v
- Target maintenance: 1:1,000 w/v
- Volume: 0.1mL to 0.5mL progression

2. Maintenance Phase:

- Frequency: Every 4 weeks
- Concentration: 1:1,000 w/v
- Volume: 0.5mL

Antigens Included:

1. Mixed Pollen Extract:

- Ragweed
- Timothy Grass
- Birch

2. Dust Mite Extract

3. Honey Bee Venom

Antigen Preparation Documentation:

- Prepared by: Dr. James Martinez
- Date of preparation: 01/30/2023
- Lot numbers: MP-2023-456, DM-2023-789, HB-2023-234
- Sterility testing completed: 02/02/2023

PROGRESS MONITORING

3-Month Follow-up (04/15/2023):

- Mild improvement in nasal symptoms
- FEV1 improved to 75% of predicted
- Rescue inhaler use decreased by 20%
- No adverse reactions to immunotherapy

6-Month Follow-up (07/15/2023):

- 40% reduction in overall symptom score
- FEV1 stable at 78% of predicted
- Medication use decreased by 30%
- Successfully reached maintenance dose

9-Month Follow-up (10/15/2023):

- 60% reduction in overall symptom score
- FEV1 improved to 85% of predicted
- Medication use decreased by 50%

- No asthma exacerbations in past 3 months

MEDICATION ADJUSTMENTS

Initial Medication Regimen:

1. Fluticasone/Salmeterol 250/50 mcg inhaler: 2 puffs BID
2. Albuterol HFA: 2 puffs q4-6h PRN
3. Montelukast 10mg daily
4. Cetirizine 10mg daily
5. Fluticasone nasal spray 50mcg: 2 sprays BID

Current Medication Regimen (as of 12/15/2023):

1. Fluticasone/Salmeterol 250/50 mcg inhaler: 1 puff BID
2. Albuterol HFA: rarely needed
3. Montelukast 10mg daily
4. Cetirizine: PRN only
5. Fluticasone nasal spray: PRN only

SAFETY AND MONITORING PROTOCOLS

Emergency Preparedness:

- Anaphylaxis emergency kit on-site
- Emergency response team available
- Written emergency protocols
- Regular staff training documented

Patient Education:

- Completed anaphylaxis recognition training
- Provided with written emergency action plan
- Educated on proper use of auto-injectable epinephrine
- Regular review of symptom diary

FUTURE TREATMENT PLANS

24-Month Evaluation Criteria:

- Symptom score comparison
- Medication use tracking
- Quality of life assessment
- Cost-benefit analysis
- Decision point for therapy continuation

Documentation Requirements:

- Monthly progress notes
- Symptom diaries
- Medication usage logs
- Adverse reaction reports
- Updated pulmonary function tests
